The information in the section titled "About the AMP Capital Core Infrastructure Fund" and subheading "Overview" and further subheading "The Fund's investments" on page 4 of the Original PDS is deleted and replaced with the following:

The Fund's investments

The Fund aims to provide diversification by investing across a broad range of infrastructure assets, sectors and geographic locations, with asset allocation targeting:

- **50% to unlisted infrastructure assets** - assets which are either: held directly by the Fund, or accessed through the Fund's investment in infrastructure funds which invest in unlisted infrastructure assets
- **50% to listed infrastructure securities and cash** - listed infrastructure securities are currently accessed through a sub-fund which is wholly owned by the Fund

The information in the section titled "Our investment approach" and subheading "The Fund's investments" on pages 7 and 8 of the Original PDS is deleted and replaced with the following:

The Fund invests in unlisted infrastructure assets (either held directly by the Fund or accessed through the Fund's investment in infrastructure funds which invest in unlisted infrastructure assets) and in listed infrastructure securities (currently through investment in a sub-fund wholly owned by the Fund). In the future, the Fund may invest in other assets and securities.

A list of the Fund's current material investments can be obtained online at www.ampcapital.com (go to the Fund page) or by contacting us.

Unlisted infrastructure assets

The Fund may access unlisted infrastructure assets in two ways:

- by investing primarily in established and yield generating infrastructure assets directly, including as a co-investor with other investors and with other clients and funds, and
- through investing in other infrastructure funds that in turn invest directly in unlisted infrastructure assets that are at any stage of the asset lifecycle, from start up to mature.

Investing directly, including as a co-investor

The Fund seeks to invest directly (either by itself or as a co-investor) in established infrastructure assets. Assets may be sourced from existing infrastructure portfolios managed by AMP Capital. Such assets may include:

- transport assets such as toll roads, airports, ports or rail which benefit from a lengthy concession from relevant government authorities
- social infrastructure assets including educational and justice facilities, hospitals and aged care
- energy and water utilities which benefit from sustainable competitive advantage and/or monopolistic positions in regulated markets, and
- assets such as rolling stock, which have typical infrastructure characteristics and return profiles.

Having an allocation to infrastructure assets through co-investment gives the Fund the opportunity to acquire assets that are generally only accessible by institutional investors. This also places AMP Capital in a position to be able to have an influence over the asset, through board representation for example, and actively manage these investments with the objectives of increasing their values and income growth prospects.

Certain terms apply when co-investing, including AMP Capital's conflict management process (see 'Co-ownership' and 'Conflict management' in the 'Fund Profile' section of this PDS).

Access through investment in infrastructure funds

The Fund may also gain exposure to unlisted infrastructure assets through investment in other infrastructure funds.

Listed infrastructure securities

The Fund currently gains exposure to listed infrastructure securities through investment in a sub-fund which is wholly owned by the Fund, which in turn invests in a customised index of infrastructure companies based on our infrastructure investment philosophy criteria (see 'Infrastructure investment philosophy' in this section). The index is made up of a portfolio of 95 infrastructure companies with a market capitalisation of more than \$2,106 billion (as at 31 December 2022). It is well diversified by country and sector and excludes sectors that are more exposed to competitive rather than regulated markets.

Classifications within the index may include:

- toll roads
- airports
- ports
- rail
- communication infrastructure, such as mobile phone towers
- integrated regulated utilities, which are more exposed to regulated than competitive markets
- transmission and distribution, such as electricity and gas networks, and
- water.

AMP Capital designs and maintains the portfolio within the index, and outsources the implementation of the portfolio to an external party which has proven expertise in implementing global equity portfolios. The external party may change from time to time. The Fund may invest in other listed securities or funds that invest in listed infrastructure securities in the future.

The information in the first paragraph in the section titled “Fund profile” and subheading “Asset allocation” on page 8 of the Original PDS is deleted and replaced with the following:

Asset allocation

Targeted asset allocations for the Fund are as follows:

- **50% to unlisted infrastructure assets** - assets which are either: held directly by the Fund, or accessed through the Fund's investment in infrastructure funds which invest in unlisted infrastructure assets.
- **50% to listed infrastructure securities and cash** - listed infrastructure securities are currently accessed through investment in a sub-fund wholly owned by the Fund.

The information in the last paragraph of the section titled “Fund profile” and subheading “Derivatives” on page 8 of the Original PDS is deleted and replaced with the following:

We impose restrictions on the use of derivatives within the Fund and monitor the implementation of these restrictions in accordance with our Derivatives Risk Statement, which can be obtained by contacting us.

The information in the section titled “Fund profile” and subheading “Co-ownership” on page 9 of the Original PDS is deleted and replaced with the following:

Under the Fund’s constitution, the Fund may co-invest with other investors, on terms which:

- give the co-owner the first right of refusal over the Fund’s interest in the asset, and
- permit the co-owner to acquire the Fund’s interest at market value if we cease to manage the Fund.

The Fund currently has co-ownership investments with other funds and third parties. As is common market practice with co-ownership arrangements, the Fund may enter into agreements with co-owners which govern a number of issues, that may include:

- business scope
- confidentiality of information
- rights to appoint the Board of Directors
- approval of major capital expenditure and financing decisions, and
- sale of shares and the rights of other shareholders (pre-emptive rights).

Agreements can also contain penalties for non-compliance, including refusal to transfer shares, and the right of a co-owner to acquire shares at valuation where a change of ownership has not been undertaken as authorised by the shareholder agreement.

The information in the section titled “Fees and other costs” and subheading “Differential fees” on page 19 of the Original PDS is deleted and replaced with the following:

Under the Fund’s constitution, the Responsible Entity may:

- deal with itself, an associate, investor or any other person

The Fund's constitution also provides that amounts may be paid to related parties for services provided to us or the Responsible Entity in connection with the Fund and for expenses. These payments are on arm's length terms.
