

Dexus Core Infrastructure Fund

As at 31 December 2023

Invest in significant infrastructure assets across airport, power transmission and distribution, rail, telecommunications, health and education sectors.

Dexus Core Infrastructure Fund (DCIF), established in 2007, gives investors access to a portfolio of Australian and global listed and unlisted infrastructure assets which are diversified by asset type, sector and location. It offers strong total return (income and capital growth) potential and is expected to have a low correlation to other asset classes, such as equities and bonds.

- Aims to provide relatively consistent returns including an attractive cash yield from a global portfolio of unlisted infrastructure assets and listed infrastructure securities.
- Access high-quality unlisted infrastructure assets usually only available to large institutional investors.
- Invest in "essential services" assets that are less influenced by market cycles than many other types of assets.
- Unlisted assets can help provide resilience during periods of market volatility as they are not subject to the speculation that impacts listed markets*.
- The combination of unlisted and listed infrastructure assets provides low volatility relative to many other asset classes*.
- The Fund's low correlation with listed markets delivers strong diversification benefits which help reduce overall portfolio risk.

+ The Fund provides investors with access to a diversified global portfolio of both unlisted infrastructure assets and listed infrastructure securities. Other asset classes will by their nature offer different investment features to the Fund, and some asset classes will provide greater liquidity than the Fund. While unlisted assets are not subject to the same level of speculation that impacts listed markets, unlisted assets offer lower liquidity than listed markets.
